

Deploy in kubernetes cluster

The screenshot displays the Kubernetes dashboard interface. At the top, the 'kubernetes' logo is visible alongside a 'default' namespace selector and a search bar. A blue navigation bar indicates the current path: 'Workloads > Deployments'. On the left, a sidebar lists various Kubernetes resources, with 'Deployments' highlighted. The main content area features two summary cards for 'CPU Usage' and 'Memory Usage', both displaying 'Waiting for more data to display chart...'. Below these, a 'Deployments' table lists the following information:

Name	Images	Labels	Pods
jobportal	Show all	Show all	1 / 1

The bottom of the image shows a Windows taskbar with the search bar, task view button, and several application icons. The system tray on the right indicates the date and time as 03-11-2022, 20:29.
